# TECH NEWS

**Hello** Faculty and Staff,

**W**eb site updated now available.

[Times<sup>2</sup> Academy's website](#) has been update. We made some change that we hope will make it more useful and informative to the faculty, staff, students and our community. The site is now easier to maintain to keep updated information. Please take a few moments and review. With you help we will try to make it even better.

Middle and high school faculty and students have special folders on the network called drop boxes. These are folder where teachers can have their students place their electronic work for the teacher to review. The folders are secure, so once the student drops a file in them they can't view are access them or anyone else's. There are many benefits of using these folders and if you would like more information please contact me and we can discuss how this feature can help you and your student.

- During Teacher Appreciation Week Tech Support will be Free.
- Our newsletter is now available online.
- If you have information that needs to be posted on our website please let us know
